

Mini Ozone Generator **FM-300SNP**

Ozone Output:	200~300 mg/hr
Generating Method:	Corona Discharge (corona tube)
Electrical:	220V/50Hz-120V/60Hz available, 8W
Control:	On/Off Rocker Switch
Air inlet & outlet Dia:	1/4" barb (6.5mm)
Power Cable:	4-ft (1.2m) in length
Case:	Plastic
Accessories:	2 sets of 4-ft tube & diffuser stone
Dimension(LxWxH):	5.6" x 3.9" x 1.8" (143x 98 x46mm)
Net Weight:	-lb (kg)

The BEYOKozone FM- series ozone generators are highly integrated corona discharge three in one units with ozone tube, ozone power and air pump in one plastic case (FM-300SNP without air pump). They have been used as a functional unit for residential air sterilizers and for water treatment, including applying to spas, baths, small pools and anywhere small volume of water sterilizing.

They are very compact design but are very powerful and enduring product.

Features:

- Up to 500 mg/hr ozone production with oxygen feed
- Able to connect with air dryer through air inlet to increase ozone output
- Ready to use upon delivery
- Safe, quiet and energy efficient
- **One year warranty with CE marked**

Benefits:

- Eliminates odors, freshens air
- Destroys airborne microbes
- Food preservation

Application:

- Kitchen, laundry room, bathroom, refrigerator
- School, hotel, entertainment
- Drinking water treatment
- Fruit, vegetable and meat detoxification
- Ornamental water features
