

Fan-type Air Purifier **GQA-F120G**

Ozone Output:	120 g/hr
Ozone Generating Method:	Surface Corona Discharge
Electrical:	220V/50Hz-120V/60Hz, 1520W
Ozone concentration:	Max.10-20 mg/L
Control:	Electronic loop controller
Accessory:	N/A
Application Range:	600-1000 m2
Case:	Stainless steel
Dimension(LxWxH):	33.5"*11.8" *23.6" (850*300*600mm)
Net Weight:	42 kg

The GQA-F series of BEYOK fan-type air purifiers are the standard axial flow fans with large air volume, can destroy bacteria, purify air and eliminate peculiar smell. They are suitable for the places which always need to clean, such like poultry farms, flower farms, greenhouses, etc.

Features:

- Simple operation
- High efficiency
- Strong ventilation
- Good dispersion
- Easy to maintain
- Long working life

Benefits:

- High efficient broad-spectrum sterilization
- Good dispersion
- Without ozone residual and secondary pollution

Application:

- Sterilization and disinfection: restaurant, hospital, packing workshop, food factory.
- Food fresh keeping: refrigerated storage.
- Deodorization: basement, garage, store room, hotel.
