Mini Ozone Generator FM-300

Ozone Output:	200 mg/hr on ambient air, 300 mg/hr on dry air
Pump Output:	4~6 SCFH (2~3 lpm)
Pump Pressure:	2 PSI (14 KPa)
Generating Method:	Corona Discharge (corona tube)
Electrical:	220V/50Hz-120V/60Hz available,10W
Control:	1-60min adjustable timer
Air inlet & outlet Dia:	1/4" barb (6mm)
Power Cable:	4-ft (1.2m) in length
Case:	Plastic
Accessories:	2 sets of 4-ft tube & diffuser stone
Dimension(LxWxH):	5.6" x 3.9" x 1.7" (143x 99 x43mm)
Net Weight:	1.4-lb (0.65 kg)

The BEYOKozone FM- series ozone generators are highly integrated corona discharge three in one units with ozone tube, ozone power and air pump in one plastic case (FM-300SNP without air pump). They have been used as a functional unit for residential air sterilizers and for water treatment, including applying to spas, baths, small pools and anywhere small volume of water sterilizing.
They are very compact design but are very powerful and enduring product.

Features:

- Compact design with high performance air pump
- Ready to use upon delivery
- Able to connect with air dryer through air inlet to increase ozone output
- Low power consumption
- Safe, quiet and energy efficient
- **One year warranty with CE marked**

Benefits:

- Eliminates odors, freshens air
- Destroys airborne microbes
- Drinking water purification
- Food preservation

Application:

- Kitchen, laundry room, bathroom, refrigerator
- School, hotel, entertainment
- Fruit, vegetable and meat detoxification
- Ornamental water features
